Education

University at Buffalo, The State University of New York **Aug 2023 - May 2027**
B.S. Information Technology & Management (4+1 MS MIS) | Cybersecurity Minor *Buffalo, NY*
Coursework: Network Technology & Cloud Infrastructure Management, Database Management Systems, Big Data Technologies, Cyber security, Privacy & Ethics, Systems Security, Statistical Decisions in Management, Financial Accounting

Experience

University at Buffalo **Aug 2026 - Present**
Project Client Intern *Buffalo, New York*
- Helped build a nonprofit's CRM from scratch, configuring 10 modules, with modules containing more than 30 custom fields, which helped automate workflows and reduce time spent on administrative tasks by 30%.
- Assist organizations in obtaining nonprofit software licensing and coordinating a Business Associate Agreement (BAA) to support HIPAA requirements for handling protected health information.
- Establish guidelines for entering, updating, and transferring data across CRM modules to improve consistency and support reliable information sharing, assisting employees in making the right decisions.

Sevenson Environmental **May 2026 - Aug 2026**
Data Management Intern *Buffalo, New York*
- Partnered with 50+ project managers to gather, standardize, and migrate 300+ project records, including proposals and Word documents, to CAD files in a centralized SharePoint database, improving access for project teams, proposal writers, and outside contractors.
- Developed an automated Power BI dashboard that provided project managers and owners with actionable insights into dredging project status, progress, and performance, helping reduce dredging startup time by 10%.
- Developed a PTO management system that automatically notified managers and logged time off in payroll, reducing employee email coordination with front desk staff and managers by 20%.

Cloud and Field Inc. **Jan 2026 - May 2026**
Application Development & Data Analyst Intern *Buffalo, New York*
- Analyzed U.S. agricultural laws and farm safety data to assess regional adoption potential, including farm density, activity levels, and injury rates, to identify target users for the company's product.
- Designed and developed the UI/UX for a mobile management application using React Native CLI and SQLite to support data storage and improve user accessibility.
- Translated business and research needs into app features, helping shape development priorities for the mobile management application.

OG Dumpling House **Jul 2024 - Present**
Manager *Buffalo, New York*
- Monitored and analyzed monthly inventory turnover for the Buffalo location, optimized restocking processes for dine-in and back-of-house inventory, and reduced overall spending by 20%.
- Led advertising initiatives from early 2025 to present across Instagram, TikTok, and Facebook, while serving as the main point of contact for an agency and local social media partner, Step Up Buffalo, increasing customer traffic by 20%.
- Supervised a 10-member service team, coordinated part-time and full-time staff in effective scheduling and bi-weekly payroll.

Projects

Personal AI Agent (OpenClaw)
Used: OpenClaw, Ollama, Next.js, Tailscale, JSON, GitHub, Workflow Automation
- Built a multi-agent AI system using OpenClaw and a locally hosted Qwen3-8B model on a Mac mini, integrating Gmail and Google Calendar to assist with email organization, tagging, tracking, and daily scheduling.
- Leveraged the AI agent to monitor portfolio performance, cut research time on investment opportunities by 20%, and inform investment decisions, achieving a 15%+ portfolio return during its use.
- Created a custom mission control dashboard to monitor agent activity, troubleshoot failures, and improve system reliability.

Spotify Data Analysis Project
Used: Python, Pandas, Matplotlib, Seaborn, NumPy
- Cleaned and standardized a dataset of over 100,000 Spotify tracks using Pandas, addressing missing values, removing duplicate records, and validating data types to support consistent comparisons and reliable analysis of audio features and track popularity.
- Used Python to analyze over 100,000 Spotify tracks across 100+ genres to uncover trends in music popularity and listener behavior.
- Performed statistical and correlation analyses using Matplotlib and Seaborn to create heatmaps, scatter plots, and other charts illustrating relationships between audio features and song performance, allowing better understanding of user mood during their sessions.

Awards

Dean's List: Fall 2023 (Freshman), Fall 2024 (Sophomore), Fall 2025 (Junior), Spring 2026 (Junior)
UB Hackathon 3rd

Skills

Technical Skills: Python, Java, Markdown, Microsoft Word, Microsoft Excel, Microsoft Access, HTML, CSS, SQL, MySQL, Customer Service, Teamwork, Time Management, Data Entry, React Native, Web Scraping
Certifications: IBM Data Analyst (Coursera), Intermediate SQL (DataCamp)
